WHERE GOLF IS SECOND NATURE

To enjoy a round of golf at Pine Barrens Golf Club is to commune with nature. Course Designer, Eric Bergstol, made perfect use of the native sand, the indigenous plant life, and the congregations of pines. Located upon 420 acres of natural terrain, Pine Barrens Golf Club is spectacular — a world-class golf destination within the protected acreage of the New Jersey Pine Barrens. Expansive, undulating, bent grass greens average over 7,500 sq. ft. and are tailored to test the skills and abilities of even the most experienced golfer. Each hole begins from one of five sets of bent grass tee boxes, which were designed to accommodate a range of playing abilities. As such, the course ranges from 5,100 to 7,125 yards. From the moment that the first ball is struck, until the last putt drops, Pine Barrens Golf Club provides a golfing experience which is simultaneously challenging, often maddening, and unfailingly exhilarating!
